Perfil

I am a programming student specialized in 3D modeling, web design and backend development.

The experience that I have I have acquired while I finished studying my third academic level, and my strengths include:

- Creativity when doing work that goes according to my skills.
- My ability to generate ideas and my ability to work in a team are my main tools as a full-stack developer.

Formación

jul 2022 - presente

Universidad Autónoma de la Laguna, Torreón

Today I am studying computer systems engineering part time. During the course, I learn more about web development and game creation, all seen as the future of technology.
